Innovative, honest and hardworking.

EDUCATION

Bachelor in Computer Science

Kathmandu University

Aug, 2017 - Mar, 2022

+2 Science

Nepal Police School

Jun, 2014 - Jun, 2017

WORK EXPERIENCE

Python Developer

Infodevelopers Pvt. Ltd.

Sep 2021 – Dec 2022 | Sanepa

- Worked on internal and external projects including retail, garage e-commerce, and loan management systems.
- Delivered multiple features and contributed to project meetings.
- Participated in requirements analysis, database modeling, and design.
- Developed customer-facing features for a garage e-commerce application.

Senior Software Engineer

Commerce Network Pvt. Ltd.

Dec 2022 – Dec 2025 | Kathmandu

- Developed and maintained a Commerce Network web system using Django and integrated EDI with third-party services.
- Implemented file upload using Flask and integrated AWS S3.
- Handled deployment and hosting for reliable system performance.
- Built EDI translation and integration for Amazon orders using EDI 810 and other transactions.
- Researched QuickBooks API integration and data processing for Freedom of Information Act (FOIA) datasets.
- Developed scalable backend APIs using FastAPI and Python, implementing validation, error handling, and debugging.

Software Engineer

DFW IT Partner

Jan 2026 – Oct 2026 | Kathmandu, Nepal

- Developed, customized, and debugged Odoo modules with business logic, data validation, and issue resolution.
- Developed bespoke modules to automate batch manufacturing orders.
- Engineered automated invoice workflows and improved data-entry accuracy.

SKILLS

Python • Django • EDI • DRF • Flask • FastAPI
SQLAlchemy • SQL • PostgreSQL • Ajax • Git • Docker
NumPy • Pandas • Elasticsearch • AWS • Pytest
pytest-django • FastAPI TestClient • API Testing • Debugging

PROJECTS

Sports Academy Management System

Technology used: Python, Django, MySQL, AWS Lambda, AWS S3, AWS RDS

- Built a cloud-based sports academy management platform with asynchronous processing and managed data storage.

Online Credit Application System (OCAS)

Technology used: Python, Django REST Framework, PostgreSQL

- Developed a loan application and credit history platform for Agriculture Development Bank Ltd.

Garage Ecommerce

Technology used: Python, Django, PostgreSQL, JavaScript, HTML, CSS, jQuery

- Developed features for an automotive e-commerce website.

Commerce Network

Technology used: Python, Django, DRF, PostgreSQL, EDI, Pandas

- Integrated EDI and automated data exchange to reduce manual errors and improve efficiency.

Document Management Platform

Technology used: Python, FastAPI, PostgreSQL, AWS S3, AWS EC2

- Built a scalable platform with asynchronous processing, JWT security, and deployment workflows.

Academic Project — Handwritten Character Recognition

Technology used: Python, Keras, Pandas

- Created neural-network-based handwritten character recognition.

Blog SaaS

Technology used: Python, FastAPI, Uvicorn, MongoDB, AWS S3

- Developed a scalable multi-tenant SaaS blogging backend using FastAPI, enabling multiple tenants to manage blog content independently.
- Implemented tenant-based data isolation, RESTful APIs, and Amazon S3 integration for secure file storage, while deploying the application on AWS EC2.
